

An Innovative ID Card Printer Technology Leader

AN INNOVATIVE ID CARD PRINTER TECHNOLOGY LEADER

IDP, one of the ID Card Printer industry, has been dedicated to make a better ID Card Printer with diverse and innovative approaches with its technology.

IDP, one of the pioneers of ID Card printing technology, has developed and manufactured ID card printers since 2005. We differentiate ourselves by providing high quality products with the latest mechanical, electronic and software technologies and by providing the best technical supports and warranties. Our card printers support not only graphic quality color printing and laminating but also all kinds of encodings such as magnetic stripe and contact and contactless smart card.

These printers are used for all kind of cards like employee badges, student IDs, payment cards, access control card, leisure membership cards and customer loyalty cards etc.

IDP aims at making plastic card printing widely available and affordable by offering simple, on-demand and customized printing solutions that bring quality to the largest scope of business users.

We wish you and us become good partners in this industry.

WISE
Wise Choice for the Highest Quality

SMART series is designed to support a flexible user environment, which makes it easy to choose the correct printer and save money. You can easily add a flipper or laminator, for dual sided printing or laminating, and various encoders such as magnetic stripe, contact and contactless. The enhanced FINE™ Imaging Technology of the SMART series enables you to print high quality images. The SMART Series will be a perfect choice for Employee IDs, Membership Cards, Access Control Badges, Secure Government Credentials, Social Services Cards, and even the instant issuance of Banking cards.

Please come and experience the flexibility and quality of the SMART series.

TECHNOLOGY

- Clear printing by FINE™ Imaging Technology
- Instant direct heating mechanism for lamination *Patent
- Field upgradable options for dual sided printing and laminating
- Field upgradable encoders for magnetic stripe, contact and contactless smart card
- Automatic ribbon recognition and no need for sensors & motors calibration
- Eco friendly rewritable printing (SMART-31R)
- 500 cards & scratch free (SMART-70) *Patent
- High-durability: Metal frame & shaft, all bearing (SMART-51 & 70)

SOFTWARE

- SMART SDK, to develop customized applications
- SMART Utilities, to check working states and adjust configurations
- Smart ID for designing and issuing cards
- On-Line technical support

CONVENIENCE

- User friendly design for desktop environment
- LCD & LED for status display of printer
- Easy Thermal Print Head (TPH) replacement
- Front input and output hoppers (SMART-31 & 51)
- Drop-in ribbon cartridge (SMART-31 & 51)
- Full modular design (SMART-70)
- Drawer type ribbon cartridge (SMART-70)

EASY
ISSUING

Smart ID ensures appropriate card issuance and data management with SMART series printers at no extra cost. This application allows you to design and issue a desired card conveniently. It can be easily used with simple essential functions. Also, it is designed for advanced user to use a variety of detailed functions.

- Design and print (Image, Photo and Text)
- 1D & 2D Barcode printing
- Auto portrait (Auto face detection, adjustment of size & position)
- Printing of sequential numbers
- Card design templates
- Plug-in for supporting external devices (Sign pad, Camera, Scanner)
- Convenient card issuance and data management
- Magnetic stripe (MS), contact & contactless smart card encoding by using plug-in program

Smart ID is a software which is provided with Smart ID Card Printer.

HIGH
SECURITY

SMART series provides effective security features for access control and data encryption.

- SMART series has a password verification function to provide administrator and user authentications.
- SMART series can set a specific authorized PC for encoding and printing cards.
- SMART series can encrypt data transmitted on USB and can support SSL (Secure Socket Layer) protocol on ethernet communications.
- SMART-70 series is equipped with physical lock and Kensington lock system on each station to increase security.

POWERFUL
NETWORKING

SMART series can utilize the network printer server for encoding and printing cards.

- SMART Ethernet module can not only print cards but also encode MS, contact and contactless smart card through the network.
- SMART Ethernet module has OCP(Open Card Print) protocol which can encode and print cards by using commands on multiple platforms without installing the printer driver.
- Available encoding the contact & contactless smart card by Ethernet.

Ideal solution for printing high-quality ID cards in moments.

Single-sided SMART-51 (51S) can be transformed into a dual-sided printer (51D) or into dual-sided printer with laminator (51L) by applying Flipper module or Laminator module at the back of the printer which can be easily installable. SMART-51 Laminator is a good option for printing and laminating at the same time which enables to produce extra security long-life ID cards with customizable security patch films. With DLW (Direct Laminating in a Wink) technology, SMART-51 Laminator ensures most stable & fast laminating with premium quality protection for ID cards.

- New Input Hopper (up to 200 cards loading)

Technologies for Printer

Plastic card Printing

Plastic cards are prevalent in our daily lives, such as payment cards driver's licenses, membership cards and employee identification badges. Their standard size, portability, and durability make them the ideal choice for many applications.

Lamination

Lamination uses polyester film onto a card's surface to protect it from heat, pressure, wear, tear and to fight adhesive things. The film is applied to card at a high temperature.

UV Panel

The UV Panel is an advanced form of panel for security that shows a fluorescence image with UV light. It is cost-effective and an easy way to protect fake cards. To prevent counterfeit, some ID cards include a UV watermark which is only visible under the UV light.

Encoding

Encoding is one of the important functions in ID card printer. We issue ID card not only for visual identification but for storing some information. There are three major encoding methods such as magnetic stripe, contact IC and contactless IC. IDP Card printer supplies all kinds of encoding options together with the picture quality printing.

smart 51 KIOSK CARD PRINTER

- Single or Dual-sided Card Printing
- Up to 4 Selectable Hoppers
- 300 or 500 Card Refillable Cartridges
- Up to 212 cards/hour (YMCKO)
- Installable MS, Contact & Contactless Encoder
- Compact and Reliable design
- Customizable bottom plate (Size, Layout of Control Panel & Adaptor, etc.)
- **SMART-51SK** : Single sided ID Card Printer
- **SMART-51DK** : Dual sided ID Card Printer

High capacity, flexible and reliable card printing module for various Kiosks solutions.

The IDP's Kiosk Card Printer is a high capacity, flexible and reliable card printing module for various types of self-service Kiosks.

Using the compact and solid SMART-51 printing engine or high performance SMART-70 printer module and multi-hopper system (up to 6 input hoppers) with detachable 300 or 500 cards cartridge, the IDP SMART Kiosk Card Printer will provide variety of choices depending on the requirements.

smart 70 Multiple Hopper

Whatever you want or need!

- **Multiple Hopper system designed to fit the SMART-70 Series**
- Up to 6 Selectable Hoppers
- 300 or 500 Cards Refillable Cartridges
- Up to 6 Different type cards loading
- Full Metal structure

Multiple Hopper system designed to fit the SMART-70 Series.

Multiple hopper system for SMART-70 is designed to fit the needs of large capacity with high efficiency for Kiosk operation.

From minimum 2 to maximum 6 large capacity 500 cards hoppers can be used depending on the user environment. Monochrome ribbon supports up to 3000 prints minimizing maintenance cost and time and up to 3000 cards loadable hoppers with 6 different types on each hopper will maximize the efficiency of Kiosk application.

Advantage of SMART-70's unique full modular design makes it possible to add Encoding module and Laminating module.

Full metal structure of the multiple hopper system is ideal for high volume issuance environment.

Applications

- ID / Membership
- Access control / Security
- Healthcare
- Banking Card
- Transportation
- Retail
- Gift / Promotion / Loyalty
